SUMMARY

Software Engineering graduate with foundational knowledge in web development using Laravel and Tailwind CSS. Experienced in API integration and basic database management. Proven track record in developing and optimizing web-based application dashboards. Highly disciplined, detail-oriented, and a collaborative team player with strong time management skills. Proficient in development tools including Git, Postman, and Laragon.

As a dedicated Web Developer focused on building robust and scalable server-side architectures, I am eager to contribute my expertise in backend logic and API development to your engineering team. My commitment to writing clean, maintainable code and optimizing database performance aligns with your mission of delivering reliable digital solutions. I thrive in solving complex technical challenges and am excited to innovate behind the scenes to ensure seamless system functionality.

EDUCATION

SMK Amaliah 1 Ciawi Bogor

July 2023 – May 2026

Major: Software Engineering

Academic Achievement: Ranked 1st–2nd in class for 6 consecutive semesters.

GPA: 87.94/100

WORK EXPERIENCE

Web Developer | PT Matik Creative Technology

July 2025 – November 2025

- Developed and enhanced application dashboards based on project specifications and requirements.
- Implemented API integrations to ensure seamless data synchronization and exchange between systems.
- Collaborated with the technical team to maintain code quality and application performance.

PROJECTS

Outbound Information Platform

April 2025

- Built a responsive landing page and information system for outbound activities, service packages, and promotions.
- Focused on high-performance UI and user experience to drive customer engagement.
- **Tech Stack:** React, Tailwind CSS.

Daily Learning Agenda Website

October 2024 – June 2025

- Developed a web-based system to streamline attendance and daily learning agenda management for teachers and students.
- Integrated features for student attendance tracking, agenda logging, and centralized data monitoring.
- **Tech Stack:** Laravel, Tailwind CSS, and Alpine.js.

SKILLS

- **Technical Skills:** Laravel, React.js, Tailwind CSS, MySQL, RESTful APIs.
- **Software & Tools:** Version Control (Git), Postman, Laragon, MS Office.
- **Personal Skills:** Time Management, Adaptive Learning, Team Collaboration, Problem Solving.

CERTIFICATIONS & TRAINING

- Junior Web Programmer Certification – BNSP, 2026
- EF SET English Certificate – C1 Advanced (62/100), 2026
- Intro to Software Engineering – RevoU, 2025
- Introduction to AI – Dicoding Indonesia, 2025
- UI & UX Competition Participant – CROWD IT, 2024
